

System Name

Menu

Rep. Name	No. of visits
Rep. Name	No. of visits
Rep. Name	No. of visits

The Main Page , will show the current day activities , where we list the Rep. Name and the number of Pharmacies visited

This is done by calling DB Procedure that return only the Rep. Name , and the Number of visits for the current day only

If the user clicked any line , it will navigate him to the Days view page and show the list of visited pharamcies for the current day order by the Time , showing the most recent on top

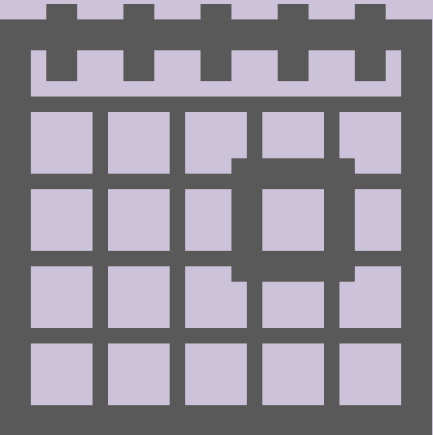

System Name

Menu

Rep. Name	No. of visits
April 2017	No. of visits
March 2017	No. of visits
Feb 2017	No. of visits
Jan 2017	No. of visits

Rep. Name	No. of visits
Rep. Name	No. of visits

This will be an accordion which is clicked will show the details of each Rep over the months (totals)

Pharmacy Name and time		

If the user selected any other day on the calendar , then the system will show the list of visited pharmacies on that day

Note : the user shall not click any day in the future.

If the Admin wants to change the Rep. Just click the left side icon , and the side panel will open then he can click a new Rep

The Visited Pharmacies will be read from a procedure `Get_Rep_visits(p_date date)` , where we pass the selected day from calendar as a parameter

If the Admin selected any pharmacy, then the system will navigate him to the Details View Page

	Rep. Name				Menu	
Pharmacy Name			Date / time			
Category 1						
Category 2						
Category 3						
Product1	Freeze	Count	Diff	Balan	ce	
Product2	Freeze	Count	Diff	Bala	n	
Product3	Freeze	Count	Diff	Bala	n	
Product4	Freeze	Count	Diff	Bala	n	
Product5	Freeze	Count	Diff	Bala	n	
Product6	Freeze	Count	Diff	Bala	n	
Product7	Freeze	Count	Diff	Bala	n	
Category 4						

The system will show the pharmacy name on top , with the date and time of the visit

Then an accordion will show the Categories of Products.

Any product that is clicked, will list the Products belong to that category , with product name , Freeze Qty, Counted Qty , Diff Qty , and Balance Qty and a flag if that item was urgent. (red star)

If the Admin wants to change the Rep. Just click the left side icon , and the side panel will open then he can click a new Rep

The categories and their items will be read from a procedure `get_visit_items(p_id number)`, here the `p_id` is the Visit internal ID , that we retrieve from the Previous page.

The proecudre will return (Category , Product , Freeze, Count,Diff,Bal,Urgent_flag)
